

a KEGG pathways

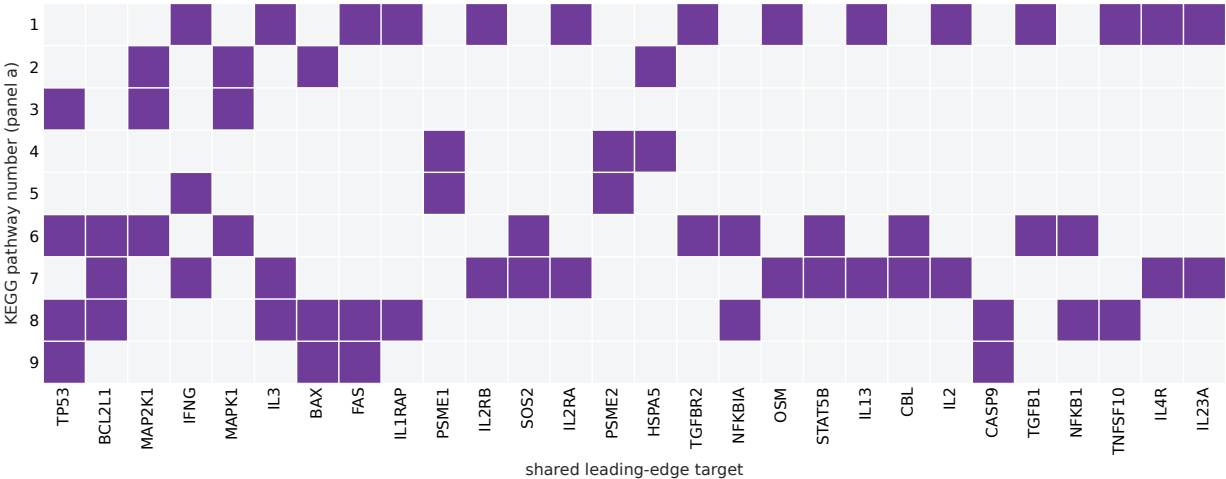

b GO-BP representatives (up to 12)

c Shared KEGG leading-edge targets (top 28 of 31)

purple = stored leading edge, including peak-score ties; targets shown in ≥ 2 pathways

● high excess-reversal-burden enrichment ○ also stable under global maxT

network-null normalized ES = observed ES / mean permutation ES

Post-hoc exploratory; eligibility is defined by the audited analysis, not by this display.
